Summary

UX/UI Designer with 3 years of experience designing scalable B2B SaaS and enterprise applications. Skilled in solving complex workflow challenges through user-centered design, research-driven insights, and system thinking. Experienced in designing dashboards, admin panels, and data-heavy interfaces while ensuring usability, accessibility (WCAG), and consistency through design systems. Proficient in leveraging AI-assisted tools to accelerate research, ideation, and prototyping while maintaining strong human-centered design principles.

Skills

UX Design: User Research, User Personas, Journey Mapping, Wireframing, Prototyping, Usability Testing, Information Architecture, Interaction Design, User Flows
UI / Systems Design: Design Systems, Component Libraries, Visual Design, Responsive Design, Accessibility (WCAG), Data Visualization, Branding
Tools and Platforms: Figma, FigJam, Adobe XD, Photoshop, Illustrator, InDesign, Canva, After Effects
AI-Assisted Design: ChatGPT, Claude, Figma AI (UX writing, research synthesis, ideation, wireframing support)
Methodologies: Agile/Scrum, Design Thinking, User-Centered Design (UCD)
Soft Skills: Problem Solving, Effective Communication, Collaboration, User Empathy, Passion for Design, Eager to Learn and Grow, Commitment to Delivering Results, Team Player, Positive Attitude

Experience

UX/UI Designer, WakandaBooks by Titandeploy – Bangalore, IN March 2025 – Present

- Leading end-to-end design for a **B2B SaaS platform** focused on inventory, warehouse, and sales management
- Designed **complex enterprise workflows** including device limit management, user roles, and admin control systems
- Created **data-heavy dashboards** to improve decision-making and operational visibility for business users
- Simplified multi-step workflows (onboarding, device restrictions, product tracking), improving usability and reducing friction
- Built and maintained **scalable design system components** to ensure UI consistency across the product
- Collaborated closely with developers to ensure **accurate design implementation**, reducing iteration cycles
- Applied **AI-assisted tools** (ChatGPT, Claude) for UX writing, flow optimization, and rapid ideation
- Contributed to **product strategy and UX decisions**, going beyond UI execution

Junior UX/UI Designer, MadHatter Creative – Bangalore, IN Jul 2024 - Feb 2025

- Spearheaded end-to-end **UI/UX design processes** for multiple client projects across industries, including IoT platforms, NFT marketplaces, EdTech solutions, Chartered Accountant firms, metro train manufacturing firms, and eBook platforms.
- Conducted user research, wireframing, prototyping, and usability testing to ensure design solutions aligned with client objectives and user needs.
- Graphic Design: Created and managed a wide range of marketing and branding assets, including: 1.Social media creatives (Instagram/LinkedIn carousels, ads, reels, posters). 2.Print and digital collaterals (brochures, product labels, standees).
- Tools used: Figma, Photoshop, Illustrator, InDesign, Canva.

UX/UI Designer, Granny's Things – Coimbatore, IN Mar 2023 - Dec 2023

- Designed and developed an **E-Commerce website** for Granny's Things skincare products, focusing on intuitive navigation, responsive layouts, and optimized user journeys to enhance customer experience and sales conversions.

- Created product **packaging and label designs**, ensuring brand consistency and visual appeal across multiple product lines.
- Collaborated with stakeholders to align design solutions with business objectives, strengthening brand identity and customer engagement.

Design Projects

E-Commerce Application - iOS and Android UX-Case-Study

- A mobile-first e-commerce concept built for iOS and Android, focused on connecting users with authentic local products (food, skincare, sweets, healthcare) from their hometown. Features include powerful search, location based recommendations, real-time order tracking, secure checkout, and a user-friendly design to enhance trust and convenience.

Distribution Management System Dashboard - SaaS Project

- Designed an intuitive dashboard for managing inventory, orders, and product performance. Integrated interactive analytics with light and dark mode for better usability. Enabled seamless order tracking and sales insights for efficient decision-making.

Certification

- Foundation of User Experience Design, Google
- INNOVOSENSE 2022 V2.0 | KPRIET.

Education

Design Boat UI/UX School - Bangalore, Professional Bootcamp in UX/UI Design Jan 2024 – May 2024

- Mastered user research, visual design principles, and interaction design techniques.
- Designed a capstone project that addressed real-world user challenges, receiving accolades from mentors.

KPR Institute of Engineering and Technology - Coimbatore, Bachelor of Electrical and Electronics Engineering Sep 2021 – May 2024

- 8.25 /10 CGPA
- Developed IoT-based solutions, such as Smart Water Level Management Systems and Smart Street Light Control.
